

Wheelhouse industries has redefined the mechanical tube cleaning gun. The Turbo Gun 35 is engineered to provide optimum performance when cleaning heat exchangers and condensers.

Turbo Gun 35 Advantages

- The perfect combination tool for cleaning tubes with increased water pressure to perform a tube sheet washdown and tube flushing.
- The right size nozzle whether cleaning a $\frac{1}{2}$ " x 22 bwg or a $1\frac{1}{2}$ " x 10 bwg.
- No proprietary threads used on the nozzles - we use standard $\frac{1}{2}$ " fittings to customize an offset for hard-to-reach areas or overall length needed.
- Our unique quick connect and swivel combination that allows the gun to swivel while under pressure.
- Our easy rebuild valve kit eliminates the hassle of constant O-ring changes.
- A splash guard affixed directly behind the nozzle to prevent operator injury from blowback of debris.
- No airline – this prevents unnecessary risks from entanglement.
- Delivers 3000 psi when needed as a high-volume high pressure washdown gun.

Key Features

- High pressure swivel
- Gun can accommodate pressures up to 3000 psi
- Three interchangeable nozzles to clean $\frac{5}{8}$ " – $1\frac{1}{2}$ " tubes
- Max flow rate up 53 gpm
- Lightweight - 4.5 pounds with high-pressure stainless-steel swivel
- Brass or SST quick connects
- 6" or 16" extensions available
- Pressure gauge to monitor cleaning progress
- Additional rotating handle for one or two-handled use
- Comfortable pistol grip
- Easy release lever trigger
- Comfortable shoulder stock
- Flexible splash guard to get into tight areas
- Interchangeable nozzles
- Can be used on all types of tubes
- Carrying case
